Profile

I completed my degree in Business Information Systems at University College Cork having achieved a First Class Honours. I am a hardworking, motivated and reliable person. I have gained strong communication, organisational and time-management skills from my previous work experiences including a six-month internship in New York and over one year working for a software development startup in the Pharma industry.

Work Experience

Business Analyst: EviView Limited | Cork, Ireland

December 2020 – June 2022

- Lead multiple software projects from requirements gathering through to development, implementation and technical support for multinational pharmaceutical and biotechnology companies.
- Acted as a SME liaison between the customer and the internal IT delivery project team. Engaged in project management by outlining expected timelines and important milestones during the development life cycle.
- Translate client business needs into software requirements - used to create concise, fully understandable user stories and requirements documentation.
- Facilitated solution reviews and feedback sessions with clients to ensure alignment with expectations.
- Kept business management up to date with the status of projects through the stages of design, development, testing and release.
- Created interactive software mockups using Google DevTools and product design web applications.
- Managed employee training for all new Junior Business Analyst recruits and offered continuous advice, guidance and mentorship on duties and best practices.
- Hosted Training workshops for new software releases and provided ongoing support to existing clients.

Web Production Intern: Northwell Health (Marketing and Communications) | New York, USA

March 2019 – August 2019

- Carried out updates to all Northwell Health websites using their Drupal Content Management System.
- Corresponded with requestors and project managers to create production schedules outlining expected completion dates for various projects.
- Collaborated with other members of the Digital Strategy team including web developers, UX designers and QA testers. Wrote retrieval and store *SQL* queries for the database of a dynamic web application.
- Created training documentation to improve the onboarding process for future interns.

Education

BSc Business Information Systems – University College Cork, Ireland

2016 – 2020

- Achieved a 1.1 First Class Honours Degree.
- Received IIBA Academic Certificate in Business Analysis after completing courses related to IS Development Methods and Software Quality.
- Studied modules related to User Interaction/Design, Programming, Accounting and Business Analysis.

Skills

Technical: HTML/CSS, JavaScript, SQL, Java, Video Editing and Microsoft Suite.

Analytical: Strategic Thinking, Problem Solving and Data Analysis.

Personal: Creative, Team Oriented and Excellent Communicator.
